### • رؤيتنا •

تسعى مجموعة الأنام لتلبية الطلب المتزايد لخدمات التنظيف و التعقيم و الخدمات الصناعية المدنية مع أحدث تقنيات التكنولوجيا لغرض تلبية احتياجات عملائنا.

# WATER TANK CLEANING & DISINFECTING

Water and air are two essential elements on earth. If we ensure a clean source for both these elements, we can enjoy a healthy life. One thing is true: we are all good users of water- but how many of us are concerned about the hygiene of the water tank used by us. We use the water in the form of pure drinking water, as well as cooking, wash vegetables, fruits etc.. and bath. Sometime you may wonder to see tanks with water weeds, bacteria, as well as formation of fungus, algae which can create unhealthy situation all around your family/tenants/staff.

So water tank cleaning & disinfecting is necessary to be performed for every six months. Our technicians attend through various trainings to cop up with challenges in this field. We can assure you a satisfactory service of water tanks cleaning and disinfecting. After completion of service we will submit detailed service report, pre and post pictures of tanks, job completion certificate , if needed we will provide water test result from laboratory.

*Clean & Disinfect your water storage tanks every 6 months for a better result of healthy water.*

## WATER SYSTEM / PIPELINE NETWORK - FLUSHING & DISINFECTING

Pipe line network system also creates unhealthy situations due to the formation of algae, fungus and stored dust inside the pipeline networks. The water which we used throughout day flows through pipeline network system, so we have to make sure that the water we use from our pipeline has to be disinfected regularly. We are providing the service of pipeline flushing and disinfecting too as per DM guidelines.

## COOL AIR

To be in an air conditioned area is a soothing experience, though we enjoy a cool breeze but we never mind of its sources. If we take a look at it, our eyes just stops at the grills but not inside to the grills. Whenever we clean the room even we clean the grills but who takes the pain of checking ducts from where the soothing air has come from? Years might have passed after air duct installation; now the air that comes through the sort of a duct will be filthy. You don't need to find the reason if you have respiratory problems. The dirty duct creates unhealthy situations around the house, office etc... If you inhale the polluted air constantly no medicine can cure your health problems completely.

## AIR DUCT CLEANING & DISINFECTING

We have fully trained Air duct cleaning professionals with high standard equipments. It's the deed middle of summer you're melting away. You could swear that the air conditioner in your location is on high, but still not getting relaxed feeling. In addition of all the edges of the duct will be full of dust which will be the reason to accumulate fungus and bacteria which will cause lot of respiratory disease like breathing problem and Asthma. We can assure you a satisfactory service of Air duct cleaning and disinfecting.

## KITCHEN EXHAUST CLEANING

Kitchen Exhaust Cleaning (often referred to as “hood cleaning”) is the process of removing grease that has formed on the walls of ducts, hood fans and vents in restaurant kitchen exhaust system. Several processes are used to clean kitchen exhaust system. The most common is the uses of chemicals are generally applied with either a garden type sprayer, downstream injection through a pressure washer, with chemical foam or machineries.

## GENERAL CLEANING

The team work includes all labor, materials, equipments, cleaning indoor and outdoor areas as per client’s request. Al Anam technicians are responsible enough to maintain the cleanliness of the work site. Duties and hour might vary depend on the building/house/office and the number of the team members.
